

NATIONAL CONFERENCE ON  
BUILDING COMMISSIONING  
SPONSOR AND EXHIBITOR PROSPECTUS

efficiency · persistence · performance

Building commissioning is increasingly recognized as a cost-effective process for optimizing building performance, reducing energy use, and improving indoor air quality, occupant comfort and productivity. The commissioning process for new and existing buildings touches many building industry disciplines from design to O&M to redesign or restoration. This year, we plan to expand our increasingly diverse constituency, connecting the key players in this market to elevate the conversation, knowledge, awareness and skills that lead to high performance buildings.

The National Conference on Building Commissioning is at the forefront of the commissioning and green building industries, playing an important role in the fight against global warming.

Sponsoring this event offers the perfect opportunity to...

**DISTINGUISH** your company from competitors through increased visibility and a demonstrated commitment to the advancement of commissioning and green building.

**DEVELOP** your business through networking and marketing opportunities.

**INFLUENCE** the future of commissioning, energy efficiency, and sustainable building.

**LEAD**
