

What's New LEED-NC®?

Joseph Higgins, PE
ARAMARK Education – Facility Services

Synopsis

This roundtable will serve as both a discussion and feedback forum for the proposed modifications to the commissioning requirements for LEED-NC Version 2.2 – to be balloted by the U.S. Green Building Council (USGBC) membership in August 2005. An overview of the proposed modifications for the prerequisite for “Fundamental Commissioning of the Building Systems” (EAp1) and the credit for “Enhanced Commissioning” (EAc3) will be presented as well as the rationale supporting the proposed changes. The associated clarifications and updates to the LEED reference guide will also be a topic of review and discussion. It is anticipated that feedback from this roundtable will be valuable in shaping the final version of LEED commissioning for years to come.
