

Cultivating Sustainability

CH2M HILL is positioned to deliver your facilities projects throughout the nation...Employing more than 14,000 people in 165 offices, CH2M HILL designs and manages the construction of more than \$3 billion in new facilities each year. Our facility services encompass all phases of project development and delivery, from strategic planning and financing through design, construction, operation and maintenance (O&M), and long-term sustainable development. In fact, *Engineering News Record* consistently ranks CH2M HILL as a top tier engineering firm.

Our team is ready to assist you with the following facility services:

- Master Planning & Programming
- Commercial Building Design (A/E Services)
- Commissioning
- Construction Management
- Sustainable Development (Energy and Water Efficiency)
- Leadership in Energy and Environmental Design (LEED™) Certification
- Indoor Air Quality
- Forensic Investigations and Expert Witness Testimony

We have successfully delivered these services for office buildings, telecommunication facilities, courthouses, research laboratories, universities and community colleges, military facilities, and hospitality facilities, such as resorts, hotels, restaurants, and sports facilities.

Owners turn to us to provide specialty facility services...where only expertise will quickly and effectively implement lasting solutions. Our talent pool includes nationally recognized experts in building commissioning and LEED™ certification—who are helping to define the way industry should commission facilities, while incorporating sustainability into the project. Internationally, we are unmatched when it comes to resolving moisture/mildew-related problems in public and commercial buildings worldwide. CH2M HILL has published the only manual specifically directed toward preventing indoor air quality problems.

These services are designed to deliver optimum performance of complex building systems from day one of operation. CH2M HILL's record of success in building commissioning goes back over 15 years and includes more than 500 buildings, saving Owners millions of dollars in building system failures.
