

E M C Engineers, Inc.

E M C Engineers, Inc. (EMC) has 26 years of engineering experience in maintaining, modifying, and upgrading commercial, institutional, industrial, and government facilities. EMC specializes in:

- Building systems commissioning & retro-commissioning
- Energy services
- Measurement and verification plans
- Planning and studies
- Sustainable design consulting and LEED™ certification.

EMC's commissioning experience encompasses a broad range of facilities, including hospitals and healthcare campuses, university and research facilities, sports facilities, training facilities, military complexes, industrial facilities, and airport facilities.

EMC currently provides a wide variety of services in the disciplines of mechanical, electrical, and controls. These disciplines are listed below.

Mechanical:

Central Chiller Plant and Distribution
Central Heating Plant and Distribution
Refrigeration Systems
Compressed Air Systems
GeoExchange Systems
HVAC
Industrial Ventilation
Plumbing
Steam and High Temperature Water

Electrical:

Communication Systems
Distributed Generation
Emergency and Standby Power Systems
Engine Generator Systems
Lighting - Interior and Exterior
Low and Medium Voltage Distribution
Security and Intrusion Detection Systems
Uninterruptible Power Supply (UPS)

Controls:

Critical Temperature and Humidity Controls
DDC Control
Energy Management and Control Systems
Supervisory Control and Data Acquisition
Utility Control
Zone and Pressure Controls

EMC has performed as the principal commissioning provider for numerous commissioning projects of various sizes (including projects over to \$100,000,000) and system types for over seven years. EMC has been commissioning provider on numerous LEED™ projects. EMC is the name to know in commissioning facilities because we provide complete services, resulting in well-running facilities.
