

Pacific Gas and Electric Company is one of the largest combination natural gas and electric utilities in the United States and serves approximately 13 million people throughout northern and central California. It also provides incentive programs, and a multitude of free services and resources to assist you with your commercial, industrial or agricultural retrofit and new construction projects.

The Savings By Design Program is a non residential new construction energy efficiency program that encourages high-performance nonresidential building design and construction and offers building owners and their design team a wide range of services:

- Design Assistance
- Owner Incentives
- Design Team Incentives
- Energy Design Resources: offers energy design tools and resources that help make it easier to design and build energy-efficient commercial and industrial buildings in California. Resources include: design briefs, case studies, online training, and more.
