

Sebesta Blomberg is an engineering based consulting firm with an unwavering commitment to quality, reliability, and effective communication. We provide technical and business solutions through engineering, commissioning, LEED® Facilitation, facility management support, construction services, and training and documentation to industrial/manufacturing, institutional, healthcare, energy, and governmental markets worldwide.

Our commissioning experts have broad, in-depth expertise in the systematic process of verifying, testing, and documenting that a building's systems are working in accordance with its owner's requirements.

Additional areas of specialization include: retro commissioning, sustainable design, utility infrastructure modernization and optimization, building systems design and analysis, energy and environmental benchmarking, environmental services, knowledge and safety solutions, and process engineering.
