

Testo – over 1,000,000 instruments in use worldwide

Testo is a world class supplier of instrumentation to the HVAC/R, critical HVAC/R, and IAQ markets. Our customers range from the on-site service technician, to the in-plant QA/QC manager, to the HVAC system design engineer. Our technologies and designs provide both mainstream HVAC/R measurements and the highest level of accuracy and precision for critical HVAC/R applications.

For over 40 years, Testo has been the “Measure of Quality” worldwide. Our dedication to quality and value that can be measured by our customers, superior product warranty (up to 3 years on many instruments), and dependable Customer Service, has made Testo one of the largest suppliers of portable instrumentation.

Handheld portable products include Reference Class instruments for temperature, humidity, pressure, velocity, CO, CO<sub>2</sub>, RPM, voltage and current. All Reference Class instruments both datalog and download to Testo’s powerful PC-based ComSoft™ software for efficient data management regardless of application.

Advanced-design stationary instrumentation includes the Hygrotest™ Series of HVAC temperature and humidity transmitters, unique pressure transmitters, an advanced line of trace moisture transmitters for compressed air applications, plus powerful accessories and displays to make installation and operation fast and easy.

Temperature and humidity dataloggers provide valuable data to pharmaceutical, food, semiconductor, environmental, HVAC, manufacturing warehousing/transportation, and many other industries. Testo dataloggers incorporate such advanced features as wireless on-site documentation and data downloading, an amazing selection of probes and accessories, third-party validated 21CFR11 compatibility, plus the first shirt pocket solution to on-site data collection. Ex (explosion proof) datalogger versions are available as well.

Testo’s quality products and services are supplied by 25 subsidiaries in 21 countries, delivered by over 1,200 employees. Our sales and services are available in over 71 countries. The high demand on quality by Testo is confirmed by our ISO 9001 approval (New Jersey and Germany), and our ISO 17025 approval for laboratory calibrations. Testo also operates an advanced DKD certified laboratory at our corporate offices.
