Heery International, Inc. brings a broad depth of talent, creativity and technical skills to facility and infrastructure commissioning projects. We are committed to providing expertise throughout a project's planning, design, construction, and occupancy. With a responsive project team, we will make the entire process a positive experience.

Founded in 1952, Heery provides building commissioning, project and construction management, equipment planning and logistics, and program management to its clients. Heery's portfolio boasts a broad spectrum of facility types including education, government, corporate/commercial, sports, healthcare, justice, and transit/aviation. With 30 full service offices and 1000 employees throughout the United States, Heery provides local resources backed by global know-how, strength and vision.

Our commissioning staff is comprised of professionals with individual strengths in mechanical/electrical engineering, test and balancing, control system programming, O&M training, energy analysis, test engineering, system troubleshooting, and LEED commissioning requirements. At the foundation of each commissioning project Heery undertakes is a strong focus on effective communication with the entire project team. We customize our reports and forms for each project performed, and include information derived from our own testing procedures. With our growing project experience in commissioning all types of facilities, we bring a hands-on approach and knowledge we apply directly to your programs to benefit you and your facilities.
