

FIRM PROFILE

Horizon Engineering Associates, LLP is a professional engineering and consulting firm specializing in the commissioning of institutional, commercial and residential facilities. Horizon was established in 1995 to provide an expert assessment of the functionality and operational efficiency of buildings, taking advantage of the operational background enjoyed by the firm's founding partners. Our operational experience and dedication to commissioning produces proactive solutions that result in functional, reliable and energy-efficient systems installed and operated in accordance with the design intent. Horizon employs 60 professionals and support staff throughout offices in New York, Michigan, St. Louis, Pennsylvania, North Carolina and Long Island.

This commitment to operations remains a core value at Horizon today, and has contributed to the company's success as a building commissioning agent for more than 30 million square feet and \$3 billion in construction cost. Commissioning represents 88% of the firm's business, and we are active in the Building Commissioning Association, for whom Michael English, Senior Partner, currently serves as President of the Board of Directors. Tom Lillie, Partner, previously served two terms as Secretary of the Board of Directors.
