

WorkingBuildings, LLC (WB) is a professional service company specializing in five primary services, building commissioning/retro-commissioning; sustainable consulting including LEED™ and SPiRiT; facilities lifecycle management software for O&M and energy management; risk mitigation and threat analysis; and forensic investigation including IAQ. WB's core competence is high performance facilities, bio-rad containment, healthcare, large and small animal facilities, pharmaceuticals and cabinet-level government agencies.

WorkingBuildings is a LEED™ accredited provider and is in the process of completing over 30 registered projects within the U.S. Green Building Council's LEED™ program. The company is headquartered in Atlanta, Ga., with satellite offices in California, Tennessee and New Mexico. WorkingBuildings provides services globally with projects in North and South America, Europe, Middle East, Far East and Pacific region.

As the nation's leading commissioning authority in containment facilities, WB is pleased to announce our new business entity WorkingBuildings & Company California, which brings together the commissioning arm of Merrick and Company, one of the leading scientific design firms in the world, and WorkingBuildings, LLC. Together, with offices in San Francisco and Los Angeles, WorkingBuildings & Company will be providing commissioning services throughout the state. WorkingBuildings delivers buildings that work!
